

3D Enable Your Data with ArcGIS Pro

Presented by: Sepideh Sepehr, Technical Solutions Specialist ssepehr@esri.ca
Sep 16, 2018

Today's Agenda

This webinar is designed to help you understand:

1. Using ArcGIS Pro to create 3D layers from point clouds and 2D data
2. Publishing 3D layers and configuring web scenes
3. Creating web applications and sharing them on the web

Resources

- **ArcGIS Solutions:**
 - [Local Government 3D Basemaps](#)
- **Learn ArcGIS:**
 - [Extract Roof Forms for Municipal Development](#)

ArcGIS Solutions for Local Government - GALLERY COMMUNITY DOCUMENTATION

Planning and Development

Local Government 3D Basemaps

Publish a collection of local government 3D basemaps that serve as a foundation for desktop, mobile and web mapping applications.

Basic Scene

The Basic Local Government Scene includes the World Topographic basemap draped over detailed elevation, simple buildings, and trees and is used to support planning and public engagement needs.

[View Scene](#)
[Learn more](#)

Schematic Scene

The Schematic Local Government Scene includes the World Topographic basemap draped over detailed elevation, more detailed buildings, and trees and is used for in-depth planning and zoning needs.
